

# CHAINSAW GLOVE CW400

# Cutter®

## USER INFORMATION

This product is compliant with the mentioned harmonised standard and PPE Regulation 2016/425

### Declaration of Conformity:

The EU Declaration of Conformity can be found at [www.cutterworkwear.com/](http://www.cutterworkwear.com/)

### Performance and Limitation of use:

Do not use for handling objects exceeding the temperature of 50°C, liquid or chemical products. Conformity according to EN 381-7:2001 protective gloves for users of hand-held chainsaws. This product is no substitute for the safe operation on a chainsaw and does not provide full protection. Carefully read all safety instructions applicable to your chainsaw. The glove should be discarded and not used again if the protective area on the left-hand glove has been damaged, washed, cleaned, or altered from its original shape. This kind of gloves does not protect you against all the risks and cuts caused by a hand-held chainsaw. All the designs and requirements of the gloves have been conceived assuming its use with the right hand. The protection might not be adequate for the use with the left hand. The chainsaw should be used with two hands following the instructions of its manufacturer. Protection in back of left glove only. No protection in fingers or thumb.

This glove has a high tear resistance and should not be worn where there is a risk of entanglement in moving machinery.

### Sizing:

S-XL

### Attention:

The components and material constituting the glove do not contain substances at rates which are known or suspected to have harmful effects on the hygiene or the health of the user, under the foreseeable conditions of use.

### Please note:

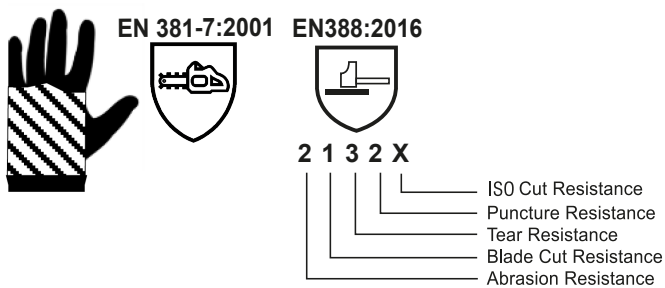

The enclosed information is intended to assist the end user in choosing the Personal Protective Equipment. The results of the laboratory tests have to assist in selecting the adapted glove, since it is understood that the real conditions of use cannot be exactly reproduced. As a consequence, the end user (and not the manufacturer) is responsible for ensuring that the gloves are adapted to the intended use.

### Cleaning:

Cleaning is not recommended.

### Storage:

The glove must be stored in a clean and dry place. It can be carried and stored in a carton box.
